Flat exposure unit and do-it-yourself kit

To expose plastic and photopolymer clichés is no challenge with these units. The exposable area is suitable for almost all commercially available clichés sizes.

An integrated clock timer will allow you a well-arranged work flow for every unit. That way, wrong exposure times belong to the past.

Easy operation, captivating quality and results which are very impressive. The warehouse at TAMPOPRINT® has a very large

choice of cliché plates, holes punched or not punched, as well as film assembly plates and accessories - all from a single source.

Even if you own a machine of an other manufacturer and use other cliché formats.

Our product range is comprised of 4 units, from the "MiniExpo" up to the "TSQ". We have the suitable size for every application.

The service range of TAMPOPRINT® AG comprises the complete offer with regard to tampon printing and laser engraving. An excellent and qualified team will support you with advice and training offers. For this reason, there is nothing to jeopardise your success.

Your TAMPOPRINT® AG

Application areas:

- Do-it-yourself production of cliché plates
- "Magnet-Aqua" cliché plates
- "Magnet-Screen" cliché plates
- "Magnet-Eco" cliché plates
- For clichés from machines of other manufacturers also

Do-it-yourself

Your advantage:

- ✓ immediate availability
- ✓ producing independently
- ✓ new cliché in one hours time

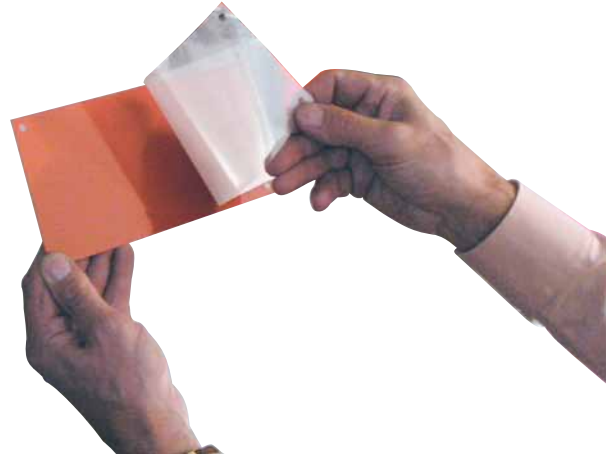

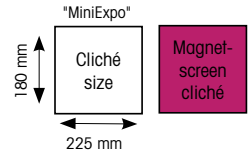

**Experience your
target on the
following
page!**

The "MiniExpo" flat exposure unit

Its equipment comprises 4 UV lamps from Philips and a clock timer. The foam material on the lid in connection with the fasteners which are fit to the sides provide for a

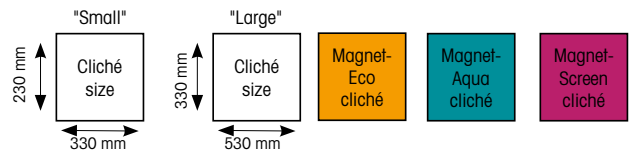

uniform contact pressure and the accurate fixing of the film material.

The "Small" and the "Large" flat exposure units

Your cliché will be exposed with high-quality UV lamps from Philips. The safety quick starters increase the lifetime and ensure that the lamps are ignited quickly. Thanks to the use of a large-volume particle filter troubles and maintenances

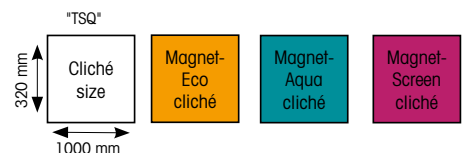

belong to the past. The magnetic valve with dirt filter reduces the vacuum when switching off the vacuum pump so that the frame can be opened immediately.

The "TSQ" flat exposure unit

is perfectly tailored to suit the TSQ machine series 60 / 90 / 120. It comes with a slide-in table with vacuum cover plate on which the tampon printing cliché is positioned and held in place by vacuum. Long and narrow clichés can be produced with it.

The "TSQ" exposure unit is characterised by its robust construction and its easy handling.
